to understand the mind and its place in nature is one of the great intellectual challenges of our time a challenge that is both scientific and philosophical how does cognition influence an animal s behaviour what are its neural underpinnings how is the inner life of a human being constituted what are the neural underpinnings of the conscious condition embodiment and the inner life approaches each of these questions from a scientific standpoint but it contends that before we can make progress on them we have to give up the habit of thinking metaphysically a habit that creates a fog of philosophical confusion from this post reflective point of view the book argues for an intimate relationship between cognition sensorimotor embodiment and the integrative character of the conscious condition drawing on insights from psychology neuroscience and dynamical systems it proposes an empirical theory of this three way relationship whose principles not being tied to the contingencies of biology or physics are applicable to the whole space of possible minds in which humans and other animals are included embodiment and the inner life is one of very few books that provides a properly joined up theory of consciousness and will be essential reading for all psychologists philosophers and neuroscientists with an interest in the enduring puzzle of consciousness

peeters 1992

a look at the search for meaning and the bizarre ways in which lives and objects are interconnected

an examination of the spiritual life of a christian and how it grows

a central claim of this book is that the emergence of humanity involves a splitting of consciousness the ability of consciousness to become reflectively aware of itself but the splitting of consciousness is simultaneously the development of the possibility of fragmentation incoherence within consciousness and alienation non unity of consciousness with others and the world thus through the growth of reflective consciousness separation comes to permeate the whole of human experience so understood it creates the need for integration and rossman s discussion ultimately centers on its attainment within this perspective various aspects of consciousness including perception organic sensation desire and belief are explored there is also extensive discussion of personal identity or the experience of being a self finally the above analyses provide the ground for discussions of freedom morality and being religious

arguing that spirituality is not about religion but about living happily this guidebook offers advice on the skills of the inner life the mind and emotions that are needed for a life of gladness this examination discusses the requirements for happiness explores their nature and shows that mastering a set of five of them leads to bliss the exercises in this resource are offered to spiritual seekers as a path towards happiness and emphasize that personal elation is not caused by external events but by mastering the skills of the inner life

andrew murray s classic guide to nurturing the inner spirit relates many inspiring spiritual stories such as the life of the prophet moses and god s thoughts as dispensed by the lord jesus christ an all embracing tour of biblical profundity the inner chamber and the inner life looks at a variety of bible stories and incidents to show the reader how to be mindful of the essential teachings of god the titular inner chambers refer to the atmosphere in which the truest prayer takes place it is by admitting ourselves to these regularly that we attain authentic inner life in writing this book murray aims to prepare and motivate the reader for this closer connection to the divine yet this book is not simply a devotional with an emphasis on prayer it is a manual which discusses improving one s relationship with god keeping oneself mindful of the sacrifice and efforts of jesus and carrying out the virtues preached by the son of god is paramount to gaining a closer bond with the force of the lord
